

Accelerate your oncology research with Fios Genomics' trusted analysis solutions for cancer omics data

Fios Genomics has exclusive access to the multi-omics **Cancer Model Database** from **Charles River Laboratories**, which features **expression**, **mutation**, and **structural variation** data for over **1,000 oncology models**.

Leveraging our expertise in bioinformatics with this proprietary database, we can support your research with:

Target Identification

Biomarker Identification

Target Validation

Indication Selection

Mode of Action

Drug Repurposing

Model Selection

Fios Genomics and Charles River Laboratories have been partners since 2020 and we can bring our combined expertise to build a solid efficacy program for your compounds.
